NIHAR PUTHRAN

Frontend Developer | React.js & JavaScript Specialist

Mumbai, India • +91 8591575101 • niharputhran09@gmail.com • **Portfolio** • **LinkedIn** • **GitHub**

PROFESSIONAL SUMMARY

Results-oriented **Frontend Developer** and B.Sc. IT candidate (CGPA: 9.50/10) with proven experience engineering responsive, scalable web applications using **React.js, TypeScript, Node.js, and Firebase**. Skilled in building full-stack platforms, integrating REST APIs, and implementing AI-driven workflows with a strong focus on client-side performance, modular architecture, and modern UX principles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Dart

Frontend & UI: React.js, React Hooks, Context API, Responsive Web Design, Flexbox, CSS Grid

Backend & Cloud: Node.js, Express.js, Firebase (Authentication, Cloud Firestore, Hosting), REST APIs, JSON

Tools & Workflows: Git, GitHub, Chrome DevTools, Postman, npm, Vite, VS Code

PROJECTS

AuraTrack — Full-Stack Mental Health Tracker | *React.js, Node.js, Firebase Auth, Firestore, AI API* [**Live Demo**]

- **Full-Stack Architecture:** Architected an end-to-end mental health platform featuring authenticated user journaling, real-time mood analytics, and interactive historical trends.
- **Secure Data & Sync:** Configured Firebase Authentication and Cloud Firestore rules to deliver sub-second data synchronization and role-based data protection.
- **AuraBot AI Assistant:** Developed and integrated AuraBot, an AI chatbot leveraging conversational LLM endpoints to analyze user mood sentiment and provide context-aware wellness suggestions.

FolderLens — AI-Powered Image Matching Chrome Extension | *JavaScript, Chrome Extensions API (Manifest V3), AI Vision, Node.js* [**Live Demo**]

- **Extension Engineering:** Engineered a Manifest V3 browser extension that scans webpage product imagery and cross-references asset repositories for instant folder resolution.
- **End-to-End Pipeline:** Developed a unified image-matching workflow bridging client-side DOM events, backend AI verification, and a centralized storage management dashboard.

DevDash — Developer Analytics & Productivity Workspace | *React.js, REST APIs, GitHub API, LocalStorage* [**Live Demo**]

- **Productivity Suite:** Built a unified developer dashboard combining real-time GitHub profile analytics, weather telemetry, interactive calendar, Pomodoro timer, and note management.
- **API Integration & Performance:** Integrated third-party REST APIs with asynchronous error handling and local caching to minimize rate-limiting and ensure zero-lag widget updates.

GameVault — Interactive Game Discovery & Distribution Platform | *React.js, JavaScript, Responsive UI/UX* [**Live Demo**]

- **Responsive Catalog:** Designed a high-performance web platform organizing downloadable browser and Android titles with dynamic category filtering and instant search.
- **User Experience:** Created an intuitive, accessible UI with streamlined one-click download access, optimized image loading, and cross-device responsiveness.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) **2023 – 2026**

Anna Leela College of Commerce & Economics | **CGPA: 9.50 / 10.0**

ACHIEVEMENTS & LEADERSHIP

- **Academic Excellence:** Consistently ranked in the top percentile of the B.Sc. IT cohort with an exceptional cumulative GPA of 9.50/10.
- **Event Leadership (TantraUtsav):** Appointed Event Sub-Head for the Arena of Aces eSports tournament; managed bracket architecture, technical regulations, and promotional design for 100+ competitors.
- **Technical Upskilling:** Completed hands-on workshops in modern web technologies, full-stack application development, and API integration.
